

VALIDITY AND RELIABILITY OF THE TURKISH TRACK QUESTIONNAIRE

Ozge Yilmaz, MD

Assis. prof of pediatrics, Celal Bayar Univ. Medical Faculty

Dept. Of Pediatric Allergy

The aim of this study was to test the validity and reliability of the Turkish TRACK questionnaire.

**TRACK: Test for Respiratory and Asthma Control in Kids
Composed of 5 items that is filled in by the family/caregiver.**

Study design: Cohort study

Study population: Wheezing children aged four years or younger that presented to the Department of Pediatric Allergy and Pulmonology clinic during the study period were enrolled in the study consecutively.

Statistical analysis completed:

Reliability analysis: Item-total score correlations

Cronbach alpha

Validity analysis: Known group method

Sensitivity to change

Working on a draft of manuscript.
